

## ADVANCED DIPLOMA IN CORONARY CARE NURSING

### Overview

The Coronary Care Nursing Course has been formulated to provide the opportunity for nurses to enhance their knowledge, clinical skills and deeper understanding of the field of coronary nursing in order to function as nurses who are competent, effective and conscientious. In addition, this course is aimed at producing graduates who possess the capability to deliver quality care in a variety of situations, including the enhancement of health, disease prevention, treatment and rehabilitation. The course is comprised of didactic and clinical practice components in order to widen student knowledge and skills in relation to the concepts and principles of coronary care nursing. All this will enhance students' competency in coronary care nursing and allow them to put into practice critical thinking skills, making clinical decisions and effective communication.

### Benefits

At the end clinical specialisation course, students will be able to:

- Enhance their knowledge and skills in a specific field of clinical nursing specialisation.
- Apply nursing values and ethics in the management of patients.
- Apply research knowledge in clinical practice.
- Take on a leadership role in providing guidance to colleagues and students enabling them to be more effective and proficient in their specific clinical practice.
- Demonstrate specific clinical practice that is of greater competence.

### Programme structure

Students must complete a **total of 40 credit hours** as required in order to qualify for the award of Executive Diploma. Each student must take and pass all courses prescribed as Core Courses and Specialisation Courses.
