

ADVANCED DIPLOMA IN DIABETES EDUCATION

Overview

This course equips students to enhance their knowledge, skills and understanding pertaining to diabetes. It also enables students to become effective and skilled teachers in the health education, treatment and nursing of diabetes patients and their families. The course is made up of didactic and clinical components in order that knowledge connected to concepts and principles of diabetes nursing is conveyed in a thorough manner, providing students with the management skills of patients with diabetes.

Benefits

At the end of the course, students will be able to:

- Integrate knowledge relating to diabetes and educational psychology for patients and their families.
- Apply practical skills which are safety-conscious, competent and effective according to the needs of the patient.
- Apply professional values in the providing of education and treatment to patients.
- Demonstrate effective communication and leadership skills in teamwork.
- Apply IT knowledge and skills in the management of diabetes and studies throughout life.
- Integrate entrepreneurship skills in diabetes management.
