DATE:

Reminder: Please read all the information in this leaflet carefully

1.What is HSG?

It is an X-ray procedure that examines female reproductive system. HSG procedure will only be done once your menstrual period end. You need to inform the date of your first day menstrual cycle to the appointment staff so your HSG appointment date can be given to you accordingly. The appointment date will be given to you on your last day of menstrual cycle (if possible).

2. How is the procedure done?

- A special tool will be inserted into the vagina and contrast medium will be injected by the Radiologist. X-ray images will be taken throughout the procedure.
- If you have any allergies towards medication, seafood or have history of asthma, please inform the staff on duty.
- If you have a steroid prescription please remember to take your dosage as advised.
- For female patient of child bearing age, the HSG will be done 10 days from their 1st menstrual day.

Patient preparation before the HSG procedure :

- Do not take any food 3 hours prior to your procedure.
- You are advised to be accompanied by someone on procedure day.

Post HSG Care

There is a possibility of vaginal spotting or fluid discharge after the procedure for one or two days. However if the vaginal discharge is prolonged kindly consult your doctor.
