This programme is designed for the medical professional who has limited or no

formal training in diagnostic ultrasound and

wishes to learn the basic concept of

ultrasound applications in gynaecology.

### Objectives

Physicians successfully completing the course should be able to safely and consistently recognize the ultrasonographic appearance of named structures or features in pelvis and to diagnose important gynaecological conditions

### Faculty

Members of the faculty consists of

consultant radiologist, consultant

obstetricians & gynaecologists and ultrasonologists

from University Malaya Medical Centre.

### Hands – on

Every participant will have the opportunity

for “hands on” training on volunteers in

small groups.

- ◆ A short assessment will be carried out at the end of the course.
- ◆ A course certificate will be awarded.
- ◆ Limited to 20 participants

### Saturday, 10 July 2010
