

## **INTRODUCTION**

College of Health Sciences (COHES) aspires to be a leader of excellence in regional education in the field of health sciences. Academic programmes at COHES are developed to inspire and challenge students to achieve their full potential. All programmes aim to produce graduates with a solid grasp of knowledge in their discipline and the ability to think critically in order to solve problems. The programmes also aim to equip them with the necessary skills to easily adapt to various surroundings and prepare them for lifelong learning.

COHES ensure that all academic programmes are relevant, current and innovative to meet national and global needs. In order to stay relevant, the curriculum is continually being reviewed with input from external examiners and stakeholders. Stakeholders who include industrial liaison panels, employers and students, play an active role in curriculum design and review. Programme approval, monitoring and review processes which involve consultations with the informed community members to ensure that the teaching-learning methods of all programmes are appropriate and current.
