

COMPETENCY WORKSHOP

The College of Health Sciences is also conducting the followings competency workshops and courses for staff of University Malaya Medical Centre as well as for private organizations:

- i. Intravenous Therapy
- ii. Blood Taking (Phlebotomy)
- iii. Teaching Methodology
- iv. Essentials of Clinical Teaching

INTRAVENOUS (IV) THERAPY

Overview of the Workshop

Intravenous therapy workshop is designed to provide nurses, MLTs, Radiographer, Medical Assistant and Research Assistant Officers with the opportunity to enhance their knowledge, skills and attitude in intravenous therapy. The workshop is made up of didactic and clinical components in order that knowledge connected to concepts and principles of intravenous therapy is conveyed in a thorough manner, providing participants with the detailed management skills and care of patients with intravenous therapy. In addition, this workshop is aimed to develop staffs that are competent and innovative in demonstrating the right technique and skills of cannulation and administering intravenous medications.

Structure of the Workshop

The participants must complete a total of 5 days of theory and practical session in the classroom. The participants are required to practice the skills for three months in their respective clinical area before they could sit for the theory and practical examinations or Objective Structured Clinical Examinations (OSCE). For participants who passed their theory and OSCE, they will be awarded with Certificate of Competency in Intravenous Therapy.
