## **UM** SPECIALIST CENTRE

UM Specialist Centre (UMSC) is a tertiary medical centre with super-specialty services located along Jalan Universiti, Petaling Jaya. It is adjacent to the largest teaching hospital in Malaysia, University of Malaya Medical Centre (UMMC) and the oldest Faculty of Medicine founded in 1905.

UMSC is part of an integrated regional healthcare hub with UMMC, The Faculty of Medicine and The Faculty of Dentistry. This International Centre of Excellence cluster capitalizes on our more than 100 years old tradition and ethos of Care, Research & Education (C.A.R.E) supported by a world-class healthcare infrastructure and a team of compassionate & altruistic healthcare team.

UMSC epitomises "Clinical Excellence" by leveraging on our unique "faculty practice" model where senior academics, faculty professors and key opinion clinical leaders of the institution provide unrivalled cutting edge clinical services through a collaborative team-based approach where patients get the "best of the best".

# Up coming...

# Mammography Service at UMSC

UMSC offers mammography services by our imaging department. As a diagnostic and screening tool, mammography detects breast cancer early through detection of microcalcifications or masses. Mammogram images are interpreted by a team of dedicated radiologists who is lead by Associate Professor Dr Yang Faridah Abdul Aziz, specializing in Breast Imaging, Cardiac Imaging and Radiology. Consultation is provided by our breast surgeon, Professor Dr Yip Cheng Har who has over 20 years of experience and Associate Professor Dr Nur Aishah with more than 10 years herself.
