

Patient Management System

Manages medical and administrative information including patient demographic, information, appointments, billings and reports.

Module includes: -

1. Registration
2. Patient Management (Inpatient and Outpatient)
3. Emergency Patient Management
4. Billing Management
5. Electronic Medical Records
6. Lab Order and Result
7. Radiology Order and Report
8. Operation Management
9. Nursing Station Management
10. Pharmacy Management
11. MIS (Reports) Management
12. Sample Tracking Management
13. Document Management System
14. Queue Management System
15. Diet and Nutrition
16. Mortuary Information System

Pharmacy Management System

Designed to receive prescription from doctors, manage and control dispensing procedure, record patient's medication history, manage pharmaceutical manufacturing procedure, manage inventory and procurement information in the pharmacy main store and satellite stores.

Module includes: -

1. E-Prescribing
 - Outpatient Prescribing
 - Inpatient Prescribing
 - TPN Prescribing
2. Dispensing
 - Screening
 - Issuing
3. Pharmaceutical Manufacturing
 - Batch Manufacturing
4. Store Management
 - Stock Management
 - Purchasing
5. Admin
 - Report
 - Drug Template
 - Settings
- Total Parental Nutrition (TPN)
- CIVAS (Centralized Intravenous Additive Services)

E-Prescribing is part of the Electronic Medical Record (EMR) used by the doctors to order medication online. The medication order will be received in the iPharmacy system. The system also links with MiMS for drug info, alert, allergy and interaction.

Procurement Management System

Systematically organized to cover every step of the procurement process starting from registration of requisition until preparation of the contract.

Module includes: -

1. Tender/Quotation Requisition
2. Specification
3. Vendor Portal
4. Tender Opening
5. Technical Evaluation
6. Tender Board Meeting
7. Minute of Tender Board Meeting
8. Procurement Committee
9. Vendor
10. System Administrator

Finance Management System

A system to collect, store, manage, process, retrieve and report healthcare provider's financial data.

Module includes: -

1. General Ledger
2. Budget
3. Project Costing
4. Account Payable
5. Account Receivable
6. Counter
7. Cash Book
9. Investment
10. Loan
11. Purchasing
12. Asset Management
13. Stock Management
14. Budget Preparation
15. EIS

Project Monitoring System

Monitors current progress and status of different projects from planning to execution stage. Users can register, update and monitor projects more systematically.

Module includes: -

1. Project Registration
 - Project Information
 - General Information
 - Dashboard
 - Financial Information
 - Project Progress
 - Implementation Progress
 - Procurement Progress
 - Notes and Attachment
2. Reports
